To: Engineering Society Members
From: Mike Brown, Vice President (Academic) 2009-2010
Subject: Weekly Summer Report #4
Date: June 1, 2009

What tasks have you done over the past week?

- Continued working on remaining transition manuals for officers: Some of the manuals were older than I anticipated, so I'm chasing a lot of information down, particular contact information for individuals.
- Started to work on website content: The new academic section of the website is up and under construction. Each of the three major services/groups under the Academic portfolio now has a section and will be expanding in the coming months.
- Continue reading academic literature: Read more of my book on project based learning.
- BBQ #3: Another successful bbq despite some poor weather.
- Draft response to transcript changes/process: In response to changes that were made at the last senate, I have a rough draft of a letter I'll be sending out voicing concerns about the process that was undertaken.
- BED Reimbursements: Civil and EngPhys have made their BED purchases, I'm in the process of getting reimbursements underway.

What do you want to accomplish in the next week?

- Continue updating and working on the website.
- Continue to deal with BED reimbursements.
- Look into supplemental exam policies.
- Meet with Academic Affairs Commissioner of AMS to discuss OUSA and CASA events.
- Draft academic suggestion form.
- Continue reading academic literature.
- Investigate future curriculum changes.

Conclusion

As always, if you have any questions or comments, be sure to email me at vpa@engsoc.queensu.ca

Cheers,
